

OZONE TREATMENT FOR HOTELS, MOTELS, APARTMENTS, DORMITORIES, OFFICES

OZONE GENERATOR 10G is a portable system to be used to neutralize odors and freshens smoke-filled rooms. After your guest left the hotel or motel room, remaining odors from food and beverages, tobacco smoke, or other elements cannot be eliminated by regular cleaning. After a hotel room has been cleaned, run the unit for 10-20 minutes in the unoccupied room to purify the air and remove stale odors. In case there is an individual heating and cooling system in the room, turn the fan on and set to re-circulate to remove odors inside the system itself and ducts.

OZONE GENERATOR 10G

CONVERT "SMOKING ROOMS" TO "NON-SMOKING ROOMS"

Operating the unit at about 20 to 30 minutes, you can sanitize the room and convert smoking rooms to non-smoking rooms. This simple process is chemical-free, time-saving and has low operating costs.

SMELL THE FRESH AIR, NOT THE AIR FRESHENER.

OZONE GENERATOR 10G, LOW WEIGHT, COMPACT, ODOR NEUTRALIZER

HOW TO USE THE OZONE GENERATOR 10G

- Position the unit as close as possible to the odor source. In such environments as motels that have individual heating and cooling systems, turn the fan on and set to re-circulate.
- The unit should be placed on dry, stable and vibrate-free surfaces.
- Please make sure not to clog the air flow, clothes, curtains, walls, etc.
- Please do not place the unit near inflammable gases or direct fire.
- Please do not place on rug flooring to reduce dust entering the unit.
- Please use the device in unoccupied spaces only! During the application, there must be neither people nor animals in the room.
- Seal off all the openings of the room. Close all the doors and windows to prevent ozone from escaping the environment.
- Plug the unit into any 220V outlet.
- Turn the unit ON from the ON/OFF switch located at the back of the device. A signal will sound.
- Set the required treatment duration with the help of the TIMER. If you press the TIMER button once, the unit will work for 10 minutes. In order to increase the application time, press the TIMER button in sequences until the desired minute light is on (between 10 – 120 minutes).
- To cancel the programmed operation or to stop the device, press and hold TIMER button for 5 seconds. This will stop the ozone production. To turn off the device completely, use the ON/OFF button located at the back of the device.
- Leave the room immediately once the device is switched on.
- Make sure to use a warning sign **NO ENTRY-DISINFECTION** in order to prevent entries to the room.
- After the completion of the application, the unit will automatically stop. Wait at least an hour before entering the room.
- Open all the doors and windows and ventilate the room at least 30 minutes before entering the room.

HOW OZONE IS PRODUCED BY ELECTRICITY?
